

MAGNILUMENTM

UV BLOCKING SERIES

FEATURES:

- ETL and DLC Certifications
- Comes standard with removable LED board light diffusers
- Comes standard with a 0-10V dimming driver
- Magnetic, quick connect mounting

Now offering **LED UV Blocking** Retrofit Kits!

Z **ZLED**
LIGHTING
ZLED-LIGHTING.COM

Clean-room facilities are utilized as part of specialized industrial production or scientific research, including the manufacturing of pharmaceutical items and microprocessors. These facilities require special UV shielding from regular fluorescent lamps for their light sensitive materials. ZLED Lighting now offers its Magnilumen Plus Magnetic Retrofit kit with LEDs and a special amber lens to eliminate UV radiation, thus creating a safer and more efficient working area!

- Our special UV blocking kits are the ideal retrofit system for troffers, surface mounts, channel lights, vapor lights, high bays, and direct/indirect fixtures
- Each kit contains everything needed to retrofit the existing fluorescent fixture including the driver with luminaire disconnect, LED boards, magnetic mounting clips, a plug and play wireless harness, along with wire nuts and screws
- The UV blocking polycarbonate diffuser provides only high purity light for sensitive applications
- 100% of UV up to 585nm
- Available sizes include: 2', 4', & 5'

BENEFITS

- Eliminate UV Radiation
- Energy Efficiency
- Certifications - 

APPLICATIONS

- Pharmaceutical
- Biosafety
- Schools & Universities
- Containment Areas
- Laboratories
- Research & Development
- Manufacturing
